

C-10.1

This can be done by extending the **Merger** class to be an **equalsMerger** class. In the **equalsMerger** class, the functions **firstIsLess()** and **firstIsGreater()** would be null functions. The function **bothEqual()** would add a to the **Sequence** C . Then, after this is done, C could be checked against A and B to see that it is the same size.
